<https://www.linkedin.com/in/mario-casas-donjuan/> | Monterrey, Nuevo León

PROFESSIONAL SUMMARY

Robotics and Digital Systems Engineering undergraduate with a prior background at Prepa Tec's Multicultural Baccalaureate. Strong interest in software development, robotics and data science, with both general and specialized programming skills. Good for fast learning, leadership, analytical thinking and for high productivity while working. Experienced in robotics and systems projects through participation in the First Robotics Competition (FRC) as a member of Voltec #6647, gaining time management, project delivery skills and really solid teamwork skills.

EDUCATION

Tecnológico de Monterrey, Campus Monterrey

Estimated graduation date: June 2029.

B.S. in Robotics and Digital Systems Engineering (IRS) | GPA: 3.8

Relevant Coursework: Computational Thinking for Engineering and Mathematics | Data Science for Decision Making

Prepa Tec Eugenio Garza Lagüera

Graduated: June 2025.

Multicultural Baccalaureate | GPA: 3.6

Focus on object-oriented programming (Java, Python, C++) and global competencies

Academic Distinctions: Honors Program (IB), Global Citizenship Stole, LiFE STEAM Stole

EXPERIENCE

Voltec 6647 - First Robotics Competition (FRC)

Engineering Team Member and Team Leader (2022 - 2025)

- Designed and developed competition robots, integrating OOP, machine learning, electronics and mechanics
- Served as robot driver, achieving multiple awards and qualifications to Nationals and Worlds Championships
- Contributed to innovative solutions in software and hardware, enhancing leadership, problem-solving, and teamwork skills

Escuela Voltec

Java Programming Mentor (2024)

- Guided students in learning OOP and structured coding students practices with personalized exercises
- Designed course materials and delivered a structured program for middle school students, helping them understand programming logic and connect the code with physical systems (robots)

PROJECTS

FIRST Robotics Competition | 2025 Season, Second place, and high world rank| 01/25 - 04/25

Robot driver and team leader. involved in mechanical design, electronics, and programming, including structured code development and deep debugging

IB - Computer Science| Computer Science Internal | 08/24 - 05/25

Developed a software application for a pharmaceutical company, using Java and MySQL. Gained experience in system design, data validation, and optimization through a custom development library.

FIRST Robotics Competition | 2024 Season, First Place, and Worlds qualification| 01/24 - 04/24

Focused on programming and mechanics. Applied Java for algorithmic thinking and process optimization

FIRST Tech Challenge | 2023 Season, Second place, and top 10 in Nationals| 01/23 - 04/23

Robot driver while contributing to mechanical design, and problem-solving strategy.

SKILLS AND LANGUAGES

Languages: Spanish (Native), English (C1)

Software: Java (Advanced), Python (Intermediate), C++ (Intermediate), C (Beginner)

Software & Tools: Onshape (Beginner), Git/Github (Version Control)

Soft Skills: Problem-solving, fast learning, leadership, analytical thinking, high productivity

Technical skills: Microcontroller and system programming, automation and robotics, algorithm and data structure development

EXTRACURRICULAR ACTIVITIES

FRC Competitions (2022–2025) – Voltec 6647: Roles in programming, electronics, mechanics, and as robot driver; gained discipline and teamwork under competitive conditions.

Escuela Voltec (2024) – Programming Mentor: Taught OOP and logical thinking to middle school students; led them to complete a robotics project within one semester.

RoboChamps (2024): Participated in programming and field testing; built a functioning robot in 48 hours and reached semifinals in the advanced category.

CONTINUING EDUCATION

Python Course – Coursera (2025): Introduction to Python with a focus on data structures and problem-solving.

Honors Program – Prepa Tec Eugenio Garza Lagüera (2023–2025): Advanced coursework in research, academic leadership, business management, and computational thinking.
